

ITEA communication goes fully digital

Stay connected with the
Community and subscribe now!

Since 2008, the ITEA Magazine has been a cornerstone of our communication, bringing you the latest news on ITEA and its projects through three (printed) editions per year. With dedicated project articles, interviews, and success stories, we have highlighted key countries, organisations, project (outcomes) and inspiring people within the ITEA Community.

Now, with the milestone of our 50th edition, we are making an exciting shift: we are moving fully to digital communication! This fits the needs from the ITEA Community and our commitment to sustainability.

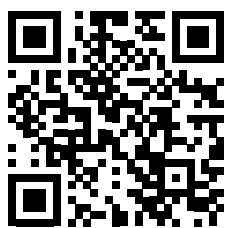

Going forward, all ITEA news and project updates will be available through news items and articles on the ITEA website, our newsletter, and LinkedIn. This change allows us to keep you informed more personally, interactively, and sustainably while continuing to showcase the incredible innovations created by our projects.

Stay connected!
