

# SPEAR won the "Best Sustainability Innovation" Award!

Inês Caetano | June 23, 2022 | 14:00 | 0 comments

We are delighted to announce that the **SPEAR project has won the "Best Sustainability Innovation" Award** from [Eureka Network](#) at the Global Innovation Summit!

For us, it was a great pleasure to collaborate with [Dr.-Ing. Anton Strahilov](#), and with our fellow colleagues from [Instituto Superior de Engenharia do Porto](#) and [IDEPA Labels & Trimmings](#), as well as all our European partners!

Notably, as a member of the project consortium, this was an excellent way for [SISTRADÉ](#) to get recognized for cutting-edge innovation in industrial sustainability! Therefore, congratulations to all Sistrade Applied Research and Innovation department team members for their hard work in putting Sistrade at the forefront of **sustainability** and **innovation** in **smartmanufacturing**! Well done!

More about the project at the [Official SPEAR website](#)!
