METAVVERSE1 WINS SILVER MEDAL

Metaverse1 received second prize in the Outstanding Achievement Award, which was handed out at the [ITEA / Artemis Co-summit](#) held in Helsinki. The project was picked from fifteen contenders.

The [Metaverse1](#) project ended this March. The project developed interoperability standards between virtual and real worlds, through sensors and actuators, visualizations, and applications in specific professional domains. One of the major achievements was the development of the ISO / IEC MPEG-V virtual worlds standard.

Almende joined the project as part of [DevLab](#).
