The issues discussed in the summit were related to the changes and disruption that are faced by the modern world. Major areas of changes which were concentrated on included the following: globalization, sustainability, management of scarce resources, climate change, urbanization, green, safe and supportive door-to-door mobility, healthcare and nutrition, and the digital society. In order to provide solutions to master the upcoming economic and societal changes, ITEA and ARTEMIS state that ICT innovation and continuous research and development (R&D) operations are needed in today's world.
