In Barco, we know that 1+1=more and therefore we co-create with partners and customers; for you, with you. That's why we are hosting and co-organizing the ITEA customer workshop on Smart Communities on 20-21 June 2018.

The ITEA customer workshop gathers customers, solutions providers and SMEs from Belgium, Canada, France, Germany, the Netherlands, Sweden and Turkey to get a better understanding of the real customer needs and pain points. The objective? Come up with solutions that could be co-created in an international R&D project focused on Smart Community solutions.

The full Smart Communities report will be available on the ITEA website shortly after the event: <https://itea3.org>
