

Exploitable Results by Third Parties

13021 INSIST

Project details

Project leader:	Özer AYDEMİR
Email:	oz@geradesoftware.com
Website:	https://itea3.org/community/project/insist/basics.html

Name: MOBIVISOR		
Input(s):	Main feature(s)	Output(s):
<ul style="list-style-type: none"> ▪ Mobile phone number or device unique identifier ▪ Company name 	<ul style="list-style-type: none"> ▪ Configurates mobile device ▪ Downloads device / enterprise policy ▪ Uploads applications to device ▪ Pre-existing product feature added according to customer needs (traffic related applications for INSIST) 	<ul style="list-style-type: none"> ▪ Device configuration ▪ Applications (including traffic density related applications)
Unique Selling Proposition(s):	<ul style="list-style-type: none"> ▪ Fast configuration ▪ Many device update capability in a short time ▪ Linked device management (especially for family subscription) ▪ Some proprietary Gerade or 3rd party contents ▪ Application store including traffic applications ▪ New feature addition capability ▪ Both iOS and Android support ▪ Customization according to company / individual needs ▪ Device tracking 	
Integration constraint(s):	<ul style="list-style-type: none"> ▪ Authorization (via QR or superuser credentials) 	
Intended user(s):	<ul style="list-style-type: none"> ▪ Mobile device users, companies who are willing that mobile devices of employees utilized according to company policy, parents willing to restraint the utilization of devices of their children, companies / parents wiling to track devices 	
Provider:	<ul style="list-style-type: none"> ▪ Gerade 	
Contact point:	<ul style="list-style-type: none"> ▪ Özer Aydemir 	
Condition(s) for reuse:	<ul style="list-style-type: none"> ▪ Subscription based ▪ Contract negotiation for new feature addition 	
<p><i>Latest update: The application is frequently updated. (see mobivisor website). The main contribution during the project was addition of applications.</i></p>		

Name: City advertisement server		
Input(s):	Main feature(s)	Output(s):
<ul style="list-style-type: none"> ▪ Preferences ▪ Customer provider media input ▪ 	<ul style="list-style-type: none"> ▪ Sends media content to passenger / driver client device ▪ Media content is selected via decision rules 	<ul style="list-style-type: none"> ▪ Media content according to server decision ▪
Unique Selling Proposition(s):	<ul style="list-style-type: none"> ▪ Rule machine for selecting content ▪ Fast decision taking and media transfer 	
Integration constraint(s):	<ul style="list-style-type: none"> ▪ Wowza media server compatibility ▪ 	
Intended user(s):	<ul style="list-style-type: none"> ▪ Municipalities installing smart bus stops of Verisun, companies who want to send / embed commercials during the utilization of their mobile applications according to customer preferences 	
Provider:	<ul style="list-style-type: none"> ▪ Gerade 	
Contact point:	<ul style="list-style-type: none"> ▪ Özer Aydemir 	
Condition(s) for reuse:	<ul style="list-style-type: none"> ▪ Subscription (price negotiated according to customer advertisement needs) ▪ 	
<i>Latest update:12 September 2018 v1.3</i>		

Name: Pixage		
Input(s):	Main feature(s)	Output(s):
<ul style="list-style-type: none"> ▪ Technical details of screens (brand, interface type, location etc.) ▪ Technical details about visibility (picture quality, screen split format etc.) ▪ Media content ▪ Stream media content provider 	<ul style="list-style-type: none"> ▪ High quality image and streaming media ▪ Adjustable image quality ▪ Adjustable content ▪ Live media content from different sources 	<ul style="list-style-type: none"> ▪ Merged display comprising several different sources including traffic density / weather data
Unique Selling Proposition(s):	<ul style="list-style-type: none"> ▪ Supporting multiple different screen brands with high quality ▪ Live stream and recorded data merged instantly before display ▪ Several different source media seeming from unified source ▪ Image processing for avoiding subtitle tilting, colour heat difference etc. ▪ Different content (advertisement, social campaign video clips, subtitle news, live score, traffic / weather cast data) ▪ Content switch ability according to preferences (rules can be pre-defined or manually from backend server) ▪ Providing not only software component but also hardware procurement abilities especially Beko, Arçelik audio / video HW components ▪ Installation and technical support 	
Integration constraint(s):	<ul style="list-style-type: none"> ▪ Explained in pixage website 	
Intended user(s):	<ul style="list-style-type: none"> ▪ Electronic billboard owners, municipalities (bus stops, public transport screens etc.) 	
Provider:	<ul style="list-style-type: none"> ▪ Koçsystem 	
Contact point:	<ul style="list-style-type: none"> ▪ Özer Aydemir 	
Condition(s) for reuse:	<ul style="list-style-type: none"> ▪ Licensed ▪ Physical installation conditions to be negotiated 	

Latest update: Check koçsystem website

Name: INSIST SOCIAL SENSOR		
Input(s):	Main feature(s)	Output(s):
Social Media Sensor Source Code	<ul style="list-style-type: none"> Can be trained over target topic (i.e. Traffic) Classify text and filters for the most related ones 	<ul style="list-style-type: none"> Topic related tweets Result in Json
Unique Selling Proposition(s):	<ul style="list-style-type: none"> The Social Media Sensor software is a Machine Learning tool, using Support Vector Machine (Supervised Learning) Runs through the predetermined Twitter Accounts and collects as many tweet as possible at each run. Topic related tweets are automatically selected via classifier. Processed by the classifier the particular city traffic related tweets are searched for their location info, which leads to geographical coordinates retrieval from google. Solid and sound tweets are exported as result in Json. 	
Integration constraint(s):	<ul style="list-style-type: none"> Java SE Runtime Environment Twitter Developer Account (token) Google Developer Account (token) twitter4j_280.jar libsvm.jar 	
Intended user(s):	<ul style="list-style-type: none"> Data Providers 	
Provider:	<ul style="list-style-type: none"> KoçSistem 	
Contact point:	<ul style="list-style-type: none"> Ferhat Kutlu – ferhat.kutlu@kocsistem.com.tr R&D Project Coordinator R&D Infrastructure and Product Dev. Group www.kocsistem.com.tr 	
Condition(s) for reuse:	Free Licence	

Latest update: <20.03.2019>

Name: KNVCity		
Input(s):	Main feature(s)	Output(s):
Satellite map views City related data like traffic density info, disaster info	<ul style="list-style-type: none"> ▪ Photorealistic 3D geographical information system 	<ul style="list-style-type: none"> ▪ 3D Virtual models ▪ Analysis results
Unique Selling Proposition(s):	<ul style="list-style-type: none"> ▪ Realistic city geographical visualization ▪ 3D, simulation or real view ▪ Urban planning (including alternate routes, disaster management etc.) ▪ Different view options 	
Integration constraint(s):	Windows 10 or higher Mac ios GPU constraints to be discussed according to usage needs	
Intended user(s):	<ul style="list-style-type: none"> ▪ Municipalities, big construction companies, organisations planning to do rescue, aid operations (eg UN, Red Cross), electricity companies 	
Provider:	<ul style="list-style-type: none"> ▪ Argedor 	
Contact point:	<ul style="list-style-type: none"> ▪ Güven Fidan ▪ 	
Condition(s) for reuse:	Licensed product

Latest update: <20.03.2019>

Name: Akıllı Durak Cepte		
Input(s):	Main feature(s)	Output(s):
<ul style="list-style-type: none"> ▪ Telephone identifier ▪ Location information ▪ User manual input ▪ Municipality traffic info web site information 	<ul style="list-style-type: none"> ▪ Public transportation information on mobile devices 	<ul style="list-style-type: none"> ▪ Bus lines ▪ Bus arrival time ▪ Traffic information
Unique Selling Proposition(s):	<ul style="list-style-type: none"> ▪ One of Turkey's earliest and most common public transportation application ▪ Shows nearest bus stop and / or line ▪ Scheduled arrival times ▪ Reported estimated arrival time ▪ Line filtering 	
Integration constraint(s):	İoS or Android	
Intended user(s):	<ul style="list-style-type: none"> ▪ "People in traffic", e.g. drivers or passengers deciding to choose public transport itinerary 	
Provider:	<ul style="list-style-type: none"> ▪ Verisun 	
Contact point:	<ul style="list-style-type: none"> ▪ Mustafa Eren ▪ 	
Condition(s) for reuse:	Licensed product
