

An ITEA Smart health project

# Food Friend

Actionable insights on nutritional intake

## Project summary

To combat diet-related diseases, the ITEA project Food Friend will develop a toolset to measure food intake and provide personalised feedback. This enables consumers, patients and healthcare practitioners to improve dietary behavior, increase compliance with prescribed diets and reduce diet-related complications in disease.

## Consortium

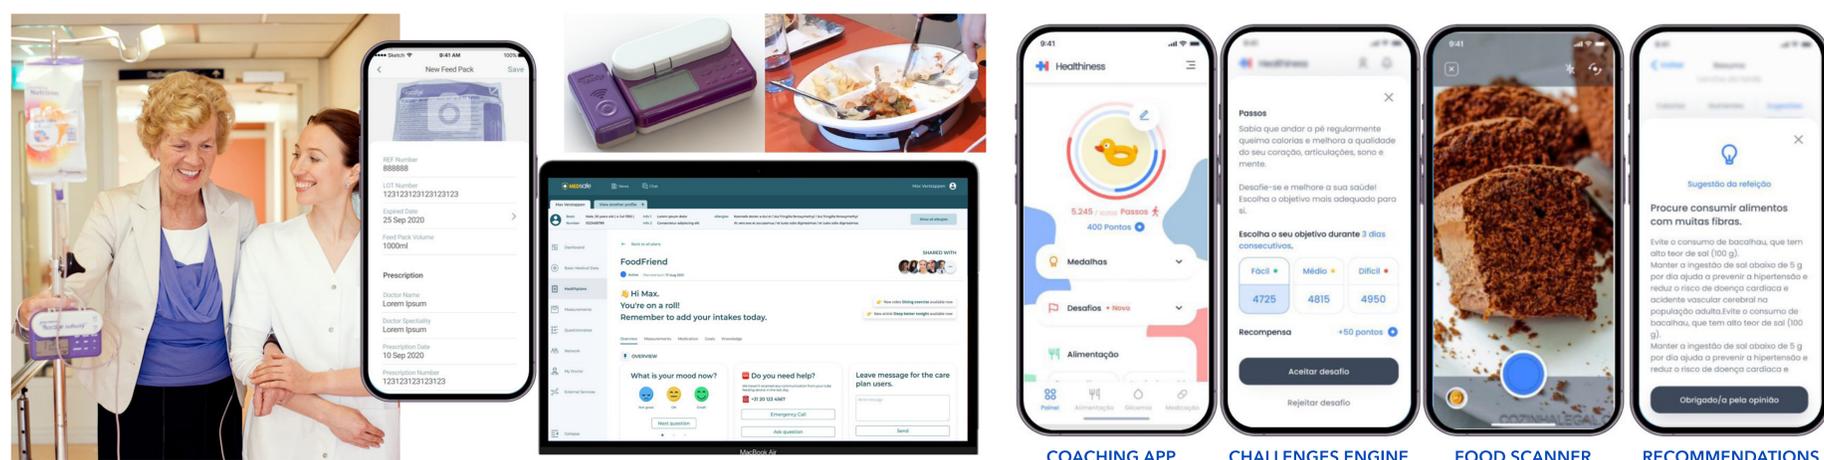

## Project duration

October 2019 - October 2023

## Key results

- > Tube feeding support tools:
  - o IOT-connected Tube Feeding Pump
  - o Patient support app
  - o Analytics module
  - o Smart plate
- > Diabetes / Obesity self-management apps
  - o Food logging by image recognition
  - o Recommendation engine
  - o Challenges engine

COACHING APP CHALLENGES ENGINE FOOD SCANNER RECOMMENDATIONS
