

Deliverable	D6.2
Deliverable title	Project Website
Due date	M6
Actual submission date	10-10-2017
Representative	The Uncomplicated Family

Panacea Gaming Platform project's website is available on www.panaceagames.com. The website has been prepared by using one of the popular content management system and all partners have been given credentials to update. It gives general information about the project, its progress; and in the near future public documents and research reports will also be available on it.

The screenshot shows the website's navigation menu with the following items: HOME, ABOUT PGP, A development framework specifically for health apps/games, ROADMAP, NEWS & DOCUMENTS, PARTNERS, and CONTACT. Below the menu, there are three checkmarks indicating features: 'Easy to develop advanced gameplay analytics tools' and 'Guidelines and Standardization for Clinical Gamification'.

The 'Roadmap & Next Steps' section includes the following items:

- Deployment of Platform Prototype v1 (Q4 2018) 25%**
First version of the Panacea Gaming Platform that will allow health games/apps to be developed
- Deployment of Platform Prototype v2 (Q1 2019) 15%**
Second and final (beta) version of the platform that will also be opened for the use of stakeholders
- Clinical Guidelines Report (Q2 2019) 15%**
Clinical guidelines that will be considered by game developers when creating effective games or gamified applications that lead to positive patient outcomes
