

A Joint AI Call 2021 project

# EXPLAIN

An explainable, interactive approach to machine learning

## Project summary

EXPLAIN (EXPLAnatory interactive Artificial intelligence for INdustry) will create an end-to-end machine learning (ML) lifecycle for industrial domain experts that provides human supervision on artificial intelligence (AI) systems and ML models. This will increase the acceptance of AI/ML in industrial settings.

## Project duration

May 2022 - May 2025

## Expected key results

- **Improved Trust in ML Models:** to enhance the trust of process experts in ML models, making it more likely that the recommendations of the models will be acted upon
- **Increased Model Transparency:** to provide clear insights into the inner logic of models, making them more understandable and accountable to both domain experts and end users
- **Collaborative ML Optimisation:** continuous feedback from end users will iteratively improve ML models, leading to higher performance and accuracy
